

America's Stonehenge is one of the largest and possibly the oldest megalithic (stone-constructed) sites in North America. Like Stonehenge in England, America's Stonehenge was built by ancient people well versed in astronomy and stone construction. It has been determined that the site is an accurate, astronomically aligned calendar. It was, and still can be, used to determine specific solar and lunar events of the year.

ASTRONOMICAL ALIGNMENTS:

- February 1 Cross Quarter Open 9 am - Sunset
- Spring Equinox Open Sunrise - Sunset
- May 1 Cross Quarter Open 9 am - Sunset
- Summer Solstice Celebration Open Sunrise - Sunset
- August 1 Cross Quarter Open 9 am - Sunset
- Fall Equinox Open Sunrise - Sunset
- November 1 Cross Quarter Open 9 am - Sunset
- Winter Solstice Open Sunrise - Sunset

Please call or visit our website for dates of Solstices and Equinoxes.

Come Explore... THE MYSTERIES OF AMERICA'S STONEHENGE.

Built by a native American culture or a migrant European population? No one knows for sure.

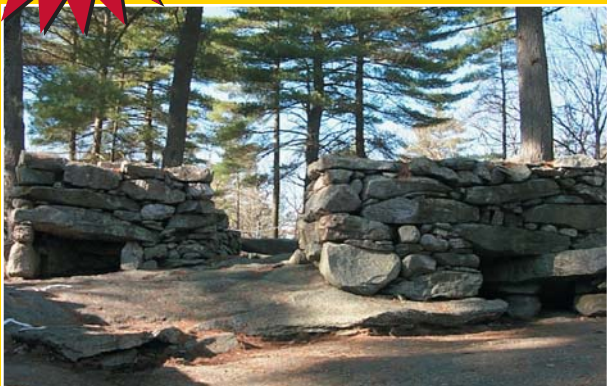

A maze of man-made chambers, walls and ceremonial meeting places, America's Stonehenge is most likely the oldest man-made construction in the United States

(over 4000 years old).

Archaeological excavation at the site has uncovered an amazing range of historic and pre-historic artifacts — from stone tools, pottery and ancient old world scripts to 18th and 19th century housewares, and manacles (possibly removed from slaves who used the site as a stop on the Underground Railroad in the 1830's and 1840's).

Along with its astronomical alignments, America's Stonehenge continues to be one of the most fascinating discoveries of the century.

New England!

Plaza area near the center of the site features several stone chambers, structures and ancient drains.

Sacrificial Table:
This 4.5-ton stone slab was probably used for ceremonial sacrifices.

The pathway to the oracle chamber.

Oracle Chamber:
The largest chamber at the site. It has two passages in the shape of a "T", plus many other features including the "speaking tube" built through five feet of stone wall and terminating under the "Sacrificial Table." Here was found the carving of the running deer.

Below: Overview of the V-hut and east-west chamber — a three-sectioned chamber, similar to ancient European structures, believed to have some astronomical significance due to its orientation.

Above: South Facing Chamber.
The entrance of this chamber is oriented to the south. Restorations of the chamber took place in 1982 and 1992 due to earthquake damage.

Get Back To Nature...

Whether you're looking for a leisurely stroll through some naturally beautiful surroundings, a hearty snow-shoeing trek through the woods, or curious

about the world before you, America's Stonehenge has something for everyone.

Snowshoeing past the summer solstice stone marker.

Celebrate...

Come join us for our various events throughout the year. The highlight is our Summer Solstice Celebration featuring colorful and cultural influences of both ancient and modern times. Other programs focus on the ecology and geology of the site.

Meet our friendly alpacas in our alpaca habitat.

Using a "sifter" to screen for artifacts.

Education & Preservation...

Continuous research and preservation of the site go hand-in-hand with our educational programs — students are introduced, firsthand, to archaeology through the use of our non-sensitive dig pit.
